Title: Disposable diaper

Claims:

1. A developing type disposable diaper comprising a liquid pervious top sheet, a liquid impervious back sheet, a liquid retaining absorbent interposed between both of the sheet, in which waist support members are disposed to either of a belly part and a back part, diaper securing portions are disposed on both right and left side portions on the side opposite to the side where the waist support members are disposed, where openings are formed on the waist support members.
2. A disposable diaper as defined in claim 1, wherein the waist support members are disposed to both right and left sides on the belly part or the back part, and the openings are disposed on both waist support members.
3. A disposable diaper as defined in claim 2, wherein at least either of the pair of waist support members is shrinkable.
4. A disposable diaper as defined in claim 1, wherein the waist portion of the belly side or the waist portion on the
